EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In each of lines 9, 10, 12 and 14 of the abstract "means" has been changed to - - device - -.

In line 29 on page 10 "blow" has been changed to - - below - -.

REASONS FOR ALLOWANCE

Claims 1 and 2 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests a parking device for vehicles in which the rotation of an input shaft of a transmission is not limited by the frictional force of an engine when the engine is brought into a halt, wherein the parking device includes a parking gear, a parking lock mechanism, a change lever, a speed-change actuator, a neutral position detection means, a parking operation detection means and a control means arranged together and functioning in the manner specified in claim 1, and particularly wherein after the neutral position of the change lever has been confirmed based on the detection signal from the neutral position detection means the control

means operates the speed-change actuator to bring the transmission into engagement with a predetermined gear when the operation of the change lever is confirmed based on the detection signal from the parking operation detection means.

Claim 2 depends from claim 1 and is allowable for at least the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. PCT/JP04/05553, filed on April 19, 2004.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

The listing of references in the Search Report is not considered to be an

information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

EP 1,251,301 A2 (Koga) discloses a parking device for vehicles in which the rotation of an input shaft of a transmission is not limited by the frictional force of an engine when the engine is brought into a halt (see e.g. paragraphs 9 and 13). However

Koga does not include the neutral position detection means, a parking operation detection means and a control means arranged together and functioning in the manner specified in applicant's claim 1.

US 4,987,792 A (Mueller et al.) discloses a shifting arrangement for an automatic transmission 3 of a vehicle including a change lever, position detecting means 4 and a control means 5. However Mueller does not disclose, among other things, the parking lock mechanism or the operation of the control means as specified in claim 1.

Accordingly, neither of the cited prior art documents shows a parking device as presently claimed. Nor does there appear to be any suggestion contained within the references which would have motivated one of ordinary skill in the art at the time the invention was made to combine the teachings of the cited references in such a manner as to arrive at the claimed parking device.
